This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE.

THE first Catalogue of the Library of the Zoological Society of London, which was published in 1854, contained about 460 titles of works. To this a Supplement, issued in 1864, added 1090 others, making a total of 1550 titles. The second edition of the Library Catalogue, published in 1872, contained about 2100 titles of works; the third, issued in 1880, 3200, to which a Supplement, issued in 1883, added 1000 more, making a total of 4200 titles.

The present (fourth) edition, which has been prepared by Mr. F. H. Waterhouse, the Society's Librarian, contains titles of about 6560 different works in the Society's Library, exclusive of the Periodicals. The Library at the present time contains about 15,000 volumes.

A few books, which have either been accidentally omitted or added to the Library too late to be inserted in their proper places, will be found catalogued in the Appendix at the end of the volume.

P. L. SCLATER,
Secretary.

REGULATIONS OF THE LIBRARY.

—♦—

I. The Library will be open every day in the week (Sunday excepted) from *Ten* in the morning to *Five* in the afternoon*, except on New-Year's Day, Good Friday to Easter Monday inclusive, and Christmas week; and it will be closed one month in the year, in order to be thoroughly cleaned, viz., from the first to the last day of September.

II. Every Fellow of the Society is entitled (*subject to the exceptions specified below*) to borrow as many as four volumes at one time.

Exceptions:—

1. Dictionaries, Encyclopædias, and other works of reference and cost, Minute-Books, Manuscripts, Atlases, Books and Illustrations in loose sheets, Drawings, Prints, and unbound Numbers of Periodical Works.
2. New Works before the expiration of a month after reception.

III. The title of every Book, Pamphlet, Map, or Work of any kind lent shall first be entered in the Library register by the Librarian, to whom application must be made by the person who wishes to borrow it.

IV. No work of any kind can be retained longer than one month; but at the expiration of that period, or sooner, the same must be returned free of expense, and may then, upon *re-entry*, be again borrowed, provided no application shall have been made in the meantime by any other Fellow.

V. In all cases a list of the Books, &c., or other property of the Society, in the possession of any Fellow, shall be sent in to the Secretary *on or before the 1st of July in each year.*

VI. In every case of loss or damage to any volume, or other property of the Society, the borrower shall make good the same.

VII. Fellows transgressing any of the above regulations will be reported by the Secretary to the Council, who will take such steps as the case may require.

VIII. Visitors to the Society's Library are requested not to replace the books they have been using on the shelves, but to give them to the Librarian to put away.

P. L. SCLATER, *Secretary.*
